DIVISION OF  
OIL, GAS & MINING**NOTICE OF INTENTION TO COMMENCE SMALL MINING OPERATIONS**

The informational requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1987, and the General Rules as promulgated under the Utah Minerals Regulatory Program.

"Small Mining Operations" means mining operations which disturb five or less surface acres at any given time.

\*\*\*\*\*

**I. GENERAL INFORMATION (Rule R647-3-104)**

1. Name of Claim/Mine: MOUNTAIN VIEW MINING/MILFORD-BRADSHAW
2. Name of Operator/Applicant: MOUNTAIN VIEW MINING  
Company ( ) Corporation ( ) Partnership ( ) Individual ( )
3. Permanent Address: 2015 W. MOUNTAIN VIEW  
City: PHOENIX State: AZ Zip Code: 85021  
Telephone Number: ( 800 ) 223-3155  
602 997-2013
4. Ownership of Land Surface:  
Private (Fee) ☐ Public Domain (BLM) ☐ National Forest (USFS) ☐  
State of Utah ☒ Other: \_\_\_\_\_
5. Ownership of Minerals:  
Private (Fee) ☐ Public Domain (BLM) ☐ National Forest (USFS) ☐  
State of Utah ☒ Other: LEASE

Form MR-SMO

Utah Mining Claim Number(s): \_\_\_\_\_

Utah State Lease Number(s): ML 40197, ML 40198 and ML 41353

6. Have the above owners been notified in writing? Yes X No \_\_\_\_\_  
 If no, why not? \_\_\_\_\_

7. Does the operator have legal right to enter and conduct mining operations on the land covered by this notice? Yes X No \_\_\_\_\_

## II. PROJECT LOCATION & MAP (Rule R647-3-105)

1. Project Location (legal description):  
 County(ies): Beaver (Mineral Mtn. area)
- |       |                                       |                    |                      |                  |                                       |
|-------|---------------------------------------|--------------------|----------------------|------------------|---------------------------------------|
| LOT 1 | of <u>NE 1/4 of NE 1/4</u>            | Section: <u>2</u>  | Township: <u>28S</u> | Range: <u>9W</u> | } not in these get via (Jenny) Wapiti |
|       | of <u>W 1/2</u> of <u>NW 1/4</u>      | Section: <u>36</u> | Township: <u>27S</u> | Range: <u>9W</u> |                                       |
|       | of <u>W 1/2</u> 1/4, of <u>SW 1/4</u> | Section: <u>36</u> | Township: <u>27S</u> | Range: <u>9W</u> |                                       |
2. A topographic base map showing the location of the proposed small mining operation must be submitted with this notice. A USGS 7.5 minute series map is preferred. The areas to be disturbed should be plotted in sufficient detail so that they can be located on the ground. It is recommended that the operator also plot and label any previous disturbances in the immediate vicinity that he is not responsible for.

## III. OPERATION PLAN (Rule R647-3-106)

1. Type of mining: Surface ☒ Underground ☐
2. Mineral(s) to be mined: Volcanic Material "Pumice"
3. Provide a brief description of the proposed mining operation and onsite processing facilities. Screening plants, conveyors, loaders, excavator, (hoe) Washer, Generator.  
Basically, a small screening operation

New Road(s): Length NO (ft) Width        (ft)

Total project surface acreage to be disturbed: 3 - 5 (acres)  
 AT THIS TIME (1 YEAR)

**IV. OPERATION AND RECLAMATION PRACTICES (Rule R647-3-107, 108 & 109)**

The reclamation and operation obligation is to keep the area clean and safe, minimize hazards to public safety, return the land to a useful condition, and reestablish at least 70 percent of the premining vegetative ground cover. To accomplish this, the operator will need to perform reclamation concurrently, or at the completion (within one (1) year) of mining:

1. Keep the mining operation in a safe, clean, and environmentally stable condition.
2. Permanently seal all shafts and tunnels to prevent unauthorized or accidental entry.
3. Plug drill holes with a five foot cement surface plug. Holes that encounter fluids are to be plugged in the subsurface to prevent aquifer contamination.
4. Construct berms, fences, or barriers, when needed, above highwalls and excavations.
5. Remove, isolate, or neutralize all toxic materials in a manner compatible with federal and state regulations.
6. Remove all waste or debris from stream channels.
7. Dispose of any trash, scrap metal, wood, machinery, and buildings.
8. Conduct mining activities so as to minimize erosion and control sediment.
9. Reclaim all roads that are not part of a permanent transportation system.
10. Stockpile topsoil and suitable overburden prior to mining.
11. Stabilize highwalls by backfilling or rounding to 45 degrees or less, where feasible; reshape the land to near its original contour, and redistribute the topsoil and suitable overburden.
12. Properly prepare seedbed to a depth of six inches by ripping, discing, or harrowing.
13. Reseed disturbed areas with adaptable species. (The Division recommends seeding 20 lbs./acre of native and introduced species of grass, forb, and browse seed, and will provide a specific species list if requested.)
14. Plant the seed with a rangeland or farm drill, or if broadcast seeded, harrow or rake the seed 1/4-1/2 inch into the soil - fall is the preferred time to seed.

PLAN OF SURFACE REHABILITATION

Pursuant to Article XVI of the Utah State Lease for Volcanic Material, this proposed Plan of Surface Rehabilitation, in compliance with the Utah Mined Land Reclamation Act, and in compliance with the Rules and Regulations adopted thereunder.

The operator of this small mining operation, Mountain View Mining, Inc., will perform concurrently or within one (1) year of the completion of mining all of the actions listed in Article IV of the attached Notice of Intention to Commence Small Mining Operations.

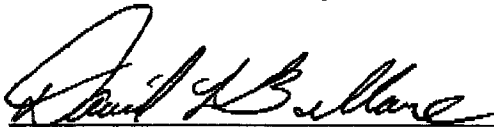

More specifically, it will:

1. Keep the mining operation in a safe, clean, and environmentally stable condition.
2. Permanently seal all shafts and tunnels to prevent unauthorized or accidental entry.
3. Plug drill holes with a five foot cement surface plug. Holes that encounter fluids are to be plugged in the subsurface to prevent aquifer contamination.
4. Construct berms, fences, or barriers, when needed, above high-walls and excavations.
5. Remove, isolate, or neutralize all toxic materials in a manner compatible with federal and state regulations.
6. Remove all waste or debris from stream channels.
7. Dispose of any trash, scrap metal, wood, machinery and buildings.
8. Conduct mining activities so as to minimize erosion and control sediment.
9. Reclaim all roads that are not part of a permanent transportation system.
10. Stockpile topsoil and suitable overburden prior to mining.
11. Stabilize highways by backfilling or rounding to 45 degrees or less, where feasible; reshape the land to near its original contour, and redistribute the topsoil and suitable overburden.
12. Properly prepare seedbed to a depth of six (6) inches by ripping, discing, or harrowing.

13. Reseed disturbed areas with adaptable species. (The Division recommends seeding 20 lbs./acre of native and introduced species of grass, forb, and browse seed, and will provide a specific species list if requested.)
14. Plant the seed with a rangeland or farm drill, or if broadcast seeded, harrow or rake the seed 1/4-1/2 inch into the soil - fall is the preferred time to seed.

DATED THIS 15th DAY OF SEPTEMBER, 1992
